

We need only accurate measurement of water pH

Should provide accurate quality analysis

water temperature should be qualified

Says

Thinks

Will it consume more time?

Will it have a high accuracy?

Is it cost efficient?

Will it be more secure?

Does

Feels

Pleasure

Anxious

Worried there are errors in the build

Fearless

Work on the sensors to get the qualified water

Alerting the authorities if the water quality is not good

Track down the locations where river is located
